

HISTORIC PHOTOGRAPH --- The Early Career of a Hall of Honor Member August 10

HISTORIC PHOTOGRAPH: As CCH members were reviewing photographs of Army cryptologic work at Arlington Hall Station during World War II, we unexpectedly found a familiar face.

The lady sitting in the back, her face partially obscured by an imperfection in the photograph, is Dr. Julia Ward. She was inducted into the Cryptologic Hall of Honor in 2002 for her work during the war in setting formats and standards in writing SIGINT reports and in assembling reference materials to support cryptanalysis, the beginnings of what developed into a large and versatile library system at NSA.

502 caption: a crowded room with 15 women workers, and Julia Ward, seen in profile, sitting in the back.
